Presented by

Dr. Morley O. Stone

Chief Technology Officer for
Air Force Research Laboratory (AFRL)

Dr. Morley O. Stone, a member of the scientific and technical cadre of senior executives, is the Chief Technology Officer for Air Force Research Laboratory (AFRL), headquartered at Wright-Patterson Air Force Base, Ohio. As the primary science and technology adviser to the AFRL commander, he is responsible for assisting with the planning and execution an annual $2.1 billion Air Force science and technology program and an additional $2.3 billion in externally funded research and development. He also serves as the corporate-level science and technology interface for a government workforce of nearly 6,000 people in the laboratory's nine technology directorates and 711th Human Performance Wing.
